Deployment Notes and Updates - Ark

Release Date - Jan 15, 2026

Improvements

- Capital Calls uploaded via Transactions
 - Capital Call batches generated through Side Nav → Transactions upload are now eligible for Cash Receipt tracking.
 - Previously, uploaded Capital Calls required a CS request to enable Cash Receipt tracking. This is no longer needed.
- Memo Tag Handling on Upload
 - Uploads now support similarly named Memo Tags without error.
 - Memo Tags that differ only by spacing (e.g., *HintNetworks* vs. *Hint Networks*) are now treated as unique values, preventing upload failures.
- Full-Screen Login Logos
 - Full-screen logos are now available as a client configuration option.
 - When enabled, the logo can span the entire right-hand side of the login screen.
 - The username and password fields will continue to display on a solid background for clarity.
 - Recommendations
 - Aspect ratio: 1920 × 1080
 - File type: SVG recommended for best scaling (JPEG or PNG also supported)

Bug Fixes

- **Read-Only User Access**
 - Fixed an issue where **Read Only** users encountered errors when accessing **Funds** pages.
- **General Mailings – Send To List**
 - Resolved an issue where the **Send To** list would break when General Mailings were sent from **Documents** after saving an email draft.
 - Email previews now render correctly after edits, and messages can be sent without issue.
 - This also resolves cases where users saw save errors even though emails were delivered.
- **Cash Receipts Date & Time Zone Issues**
 - Fixed discrepancies in **Date of Receipt** visibility for users in different time zones.
 - Time zone issues affecting **Cash Receipt → Send to GL** dates have also been resolved.
- **Allocation File Time Zone Consistency**
 - Users across all time zones will now see allocation data with the correct and expected date ranges.
- **Bulk File Organization**
 - Fixed an issue that prevented users from moving files into different folders in bulk.
 - Bulk file moves are now working as expected.
