Deployment Notes and Updates - Ark

Release Date - June 5, 2026

Enhancements

Refined Duplicate Name Validation for Assets and Memo Entities

Duplicate name validation now applies independently to Assets and Memo Entities. Names must remain unique within each entity type; however, an Asset and a Memo Entity may now share the same name, providing greater flexibility when structuring entities across both types.

Fixes

Trial Balance Report Generation

An issue preventing some clients from successfully running the Trial Balance report has been resolved. The report now generates reliably for all users.
