

Ark PES, Inc. | 545 Boylston Street, 6th Floor | Boston MA, 02116

Deployment Notes and Updates - Ark

Release Date - July 17, 2023

Bug fixes & incidentals:

- (5733) In Allocation workbooks, a user can rollback transactions in any order. Prior to this fix, users were required to rollback transactions in the order of transaction submit.
- (5746) In Allocation workbooks, a user can hide and resize columns without causing a reopening error. Prior to this fix, if a user resized & hid commitment columns, the workbook would throw an error when trying to reopen. These hidden cells are now being handled properly and will not result in an opening error.
