

Ark PES, Inc. | 545 Boylston Street, 6th Floor | Boston MA, 02116

Deployment Notes and Updates - Ark

Estimated Release Date - June 28, 2023

Bug fixes & incidentals:

- (5589) On General Emails, the Sent view is now populated with Contacts who received the email that was sent out. Prior to this fix, the Sent view would be populated with all active Contacts tied to that Fund/Investor, which may not be an accurate reflection of the recipients of the email (i.e. if a Contact was added after the email was sent, they never received the email and therefore are no longer visible on the Sent list).
- (5607) On General Emails, if a client logo is added to the email, the logo is now visible in the Edit & Preview views. Prior to this fix, users could add images to General Emails, but these images would display an icon, instead of the image, in the Preview & Edit buttons. Note: users can add one image to an email, with a file size limit of 100KB.
