Deployment Notes and Updates - Ark

Release Date: March 21, 2023

Bug fixes & incidentals:

- (5276) Capital Call & Distribution reviews are now working, and not wiping out previous approvals done by the creator of the batch. Yesterday we released a bug that was overriding the Capital Call & Distribution batch creator's reviews. This bug could be bypassed by using the tabs at the top of the page to navigate through the Capital Call or Distribution batch. With this fix, reviews will remain intact from both the tab navigation & the Save & Continue button.
