Deployment Notes and Updates - Ark

Release Date - October 1, 2024

New Features:

- **Visualizations** - We are excited to introduce our Visualizations feature in Ark, designed to provide users with deeper insights into fund data. The initial release focuses on three key pages - Admin Funds, Admin Capital Accounts, and LP Capital Accounts - each offering tailored summary cards, key metrics, and interactive graphs to help fund managers track performance indicators.

With customizable dashboards, both Admin and LP users can visualize fund performance and capital flows more effectively. Users can personalize their dashboards by selecting from a variety of summary cards and graphs, making it easy to monitor capital commitments, distributions, and other metrics.

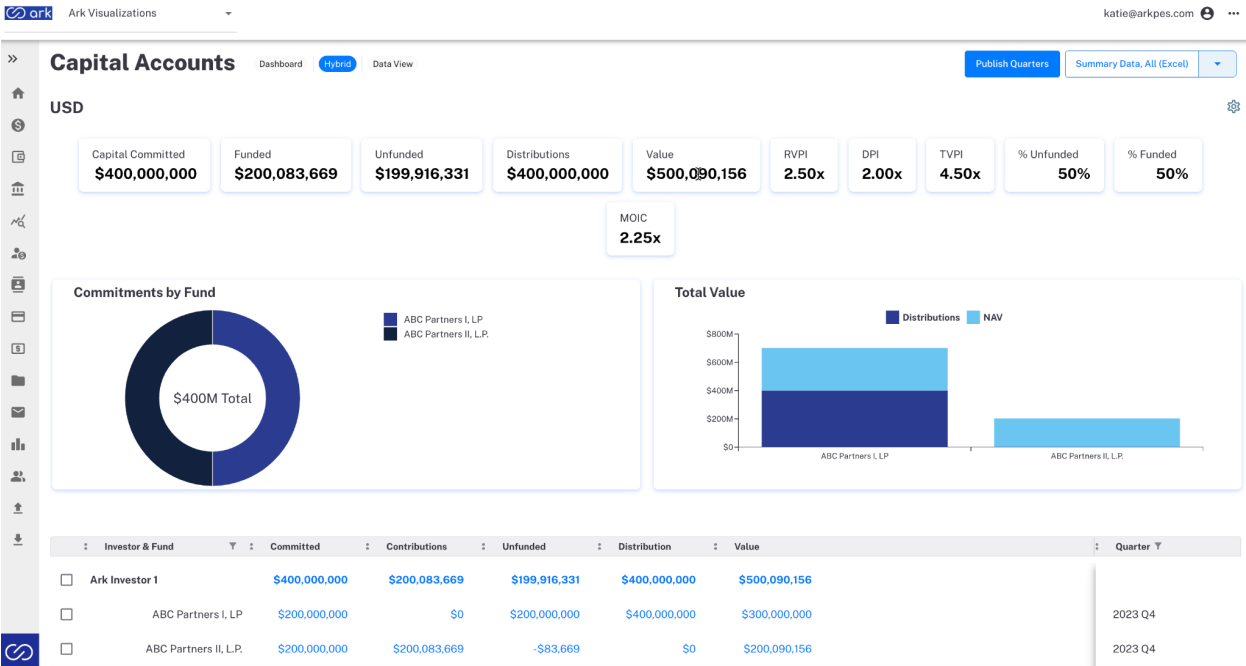

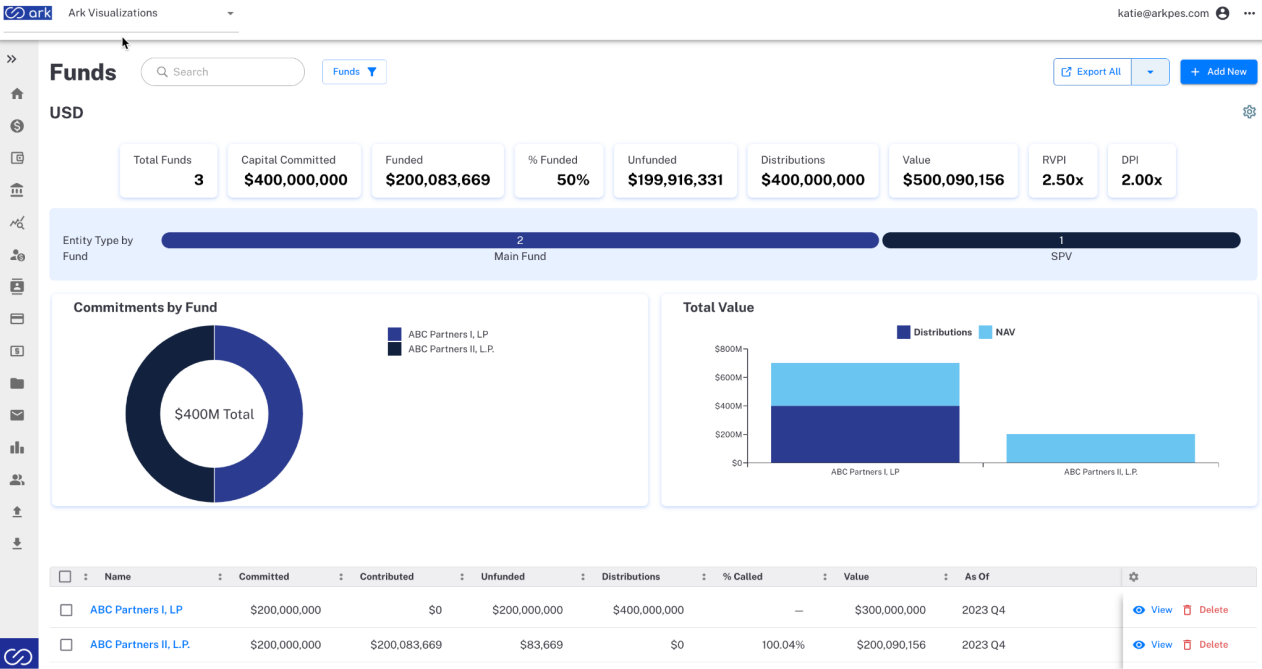

Visualizations can be toggled on or off for individual clients, giving Ark Client Admins full control over feature availability within their client configuration screens.

For a detailed guide, including a list of currently available summary cards, metric cards, and graphs per page, click [here](#).

This feature is currently in Beta. We are actively developing additional functionality and expanding it to include more pages. Your feedback is valuable in helping us improve! If you encounter any issues or have suggestions, please let us know by emailing katie@arkpes.com.
